# 1. ORGANIZATION OVERVIEW

- **Brief history of KGM INT'L**

From a humble beginning with just a handful of dedicated members, our church has grown into a vibrant and thriving community. for 16 years, we have stood as a

beacon of hope and a pillar of strength, sharing and the transformative power of faith and service.

It all began in August 2009, when our founder, Dr Rev Yohannan Uche Akwada, driven by a vision, gathered for the very first service. Held in Albertina Sisulu (a small rented hall), those early days were defined by passionate worship and a deep sense of purpose. We were a family long before we had a permanent home.

Throughout the years, our journey has been marked by milestones and memories. In (year), we moved into our first official building at 9 Davis Street, Doorenfontien, a space we filled with laughter, prayer, and community events. We launched the Yohannan Foundation, expanding our mission beyond our walls to serve our neighbours.

Today, we look back with gratitude and forward with hope. The seeds of faith planted 16 years ago have blossomed into a community of over 200 members, including in Nigeria. We're a place where friendships are forged, lives are transformed, and faith is lived out in tangible ways.

Celebrating our past, we are even more excited about our future. We invite you to join us as we continue to write our story, one chapter at a time.

- **Mission Statement**

Through the preaching and teaching of God's undiluted word. Reaching out to the less privileged in our society with the love of Christ and by praying for the nations of the world.

- **Vision Statement**

To **REACH, RAISE, and RESTORE** humanity to his original state in GOD.

- **Target audience**

All followers of Christ, both young and old

## 2. WEBSITE GOALS AND OBJECTIVES

**GOAL 1:** Effective communication about the church's mission and values

**OBJECTIVE:** This will indicate the church's core beliefs, history, and mission statement on the about page, with a goal of a 25% increase in page views of this section within the first three months of the website launch.

**GOAL 2:** Serve as a central Information tool for the congregation

**OBJECTIVE:** Maintain an up-to-date calendar of all church events, including weekly services and special event details, times, and locations easily accessible. Offer sermon archives, including audio and video recordings, allowing members to catch up on their missed messages and relive favourite ones.

**GOAL 3:** To strengthen the church's brand and digital presence.

**OBJECTIVE:** To design a visually appealing and modern website that will reflect the identity of the church. We will integrate social media feeds like Facebook to showcase church life and connect with the community on multiple platforms.

## 4. PROPOSED WEBSITE FEATURES AND FUNCTIONALITY

- **HOMEPAGE**

This is an example of how the website will look like but not exactly. I got this inspiration because this website looks aesthetically pleasing and attractive. It will be the introduction to the website and what it is all about, with an opening message from our late pastor that will be used to inspire whoever will be reading it. The navigation bar will be located at the top right-hand corner of every webpage.

- **ABOUT US**

This will have the history, mission, and vision statement as well as the team members who are involved in keeping the operations of the church running. It will have an eye-catching font and pictures, as well as a layout to give the user easy access to the information that they will be looking for.

- **CONTACT PAGE**

Basically, how to find us and how to contact us. The location of the church will be posted via a Google link, as well as a link to the Facebook page.

- **FOUNDATION PAGE**

This will be detailing the start-up of the Yohanan Foundation and how people will be able to donate to the organisation that will help in the capabilities of the foundation to help communities and church members.

- **GALLERY PAGE**

It will contain pictures of church members and the various events that we held at the church, as well as various videos.

## 5. DESIGN AND USER EXPERIENCE

- **COLOUR SCHEME**

The website will be based on what the theme of the church looks like. The church mostly has white, gold and navy-blue decorations. The foundation page one the other hand will consist of yellow, red and white as that is the colour scheme that they chose.

- **TOPOGRAPHY**

1. Homepage
2. About us
3. Yohanan Foundation
4. Gallery
5. Contact page

- **LAYOUT AND DESIGN**

The “F” pattern is a popular and research-backed layout that follows how people naturally scan a webpage. It prioritises key information in the areas where users' eyes are most likely to land.

The top of the bar stays visible as you scroll down, as well as in and out of the pages. It contains the logo on the top left and the navigation bar on the top right. The hero section will have a large, impactful image that will introduce the website with the logo of the church

The design will have a background image that showcases what the church website looks like, as well as various captivating images around it, so that it will draw attention to the people who are viewing the website and seeking information.

The layout and design approach will be visually appealing, easy to navigate and guide the user toward the most important information and actions, whether for a first-time viewer or returning member.

- **USER EXPERIENCE CONSIDERATIONS**

Easy to navigate and access various pages, as the navigation bar will automatically connect them to various pages and social media pages within the website.

## **6. TECHNICAL REQUIREMENTS**

- DOMAIN AND HOSTING

1. Domain name: the website address on the internet (e.g., kgmin'l.org)
2. Web hosting: a space that provides space for the website files. This will include reliability and uptime, scalability, and security.
3. SSL Certificate: encrypts the connection between the user's browser and the website, e.g., https://

- WEBSITE PERFORMANCE

1. Loading speed: the amount of time it will take for the website to load.
2. Mobile responsiveness: the ability to automatically adjust its layout to fit various screen sizes (on smartphones, tablets, and desktops)
3. Cross-browser compatibility: ensure that the website works properly on all major browsers.

- SECURITY AND MAINTENANCE

1. Backups: to prevent data losses
2. Regular updates: patch security vulnerabilities and ensure compatibility
3. User security: will have strong security to protect user data and privacy features
4. Privacy policy: explains how the data will be collected, how its used, and how its protected.

- ACCESSIBILITY

Designing and developing the website to meet the needs of people with disabilities, to ensure that they can also access the website and its contents. (screen reader, compatibility, keyboard navigation, high colour contrast)

## **7. TIMELINE AND MILESTONES**

- **Will be completed within 7-13 Weeks**

### **PHASE 1: Planning and strategy (1-2 Weeks)**

Milestone 1: This is where we will be assembling the project team to discuss goals, visions and the project scope.

Milestone 2: defining the goals and objectives to clearly outline what the website needs to achieve (increase first time visitors, improve member communication, facilitate online giving).

Milestone 3: choosing a secure platform and the domain name that will secure the web hosting

### **PHASE 2: Content and structure (2-4 Weeks)**

Milestone 5: creating a visual map of all the pages and how they link to each other (homepage > about us > foundation > gallery > contact us)

Milestone 6: write the text, gather photos, and create source videos. Content should be finalized before design begins to avoid rework.

Milestone 7: all the specific features the website needs (event calendar, weekly activities, online giving portal, contact form)

### **PHASE 3: Design and development (4-8 Weeks)**

Milestone 8: designer creates mock-ups or wireframes for key pages to get a feel for the look and feel

Milestone 9: Configure and install the chosen CMS and set up the base theme or template.

Milestone 10: build out all the pages, content, and implement the planned functionality

Milestone 11: Ensure that the website can fully respond to all devices and looks aesthetically pleasing.

Milestone 12: implement URLs and alt text for images

### **PHASE 4: Testing and launch (1-2 Weeks)**

Milestone 13: Thorough tests and checkups will be done on the website before it is launched

Milestone 14: Content Proofreading

Milestone 15: backup and security configurations

Milestone 16: The launch will finally be approved

#### **PHASE 5: Post launch and maintenance**

Milestone 17: Announce the launch of the website

Milestone 18: install a tool that will track user behaviour

Milestone 19: regular content updates

Milestone 20: The team will continue to update the website and security to keep the website running smoothly and securely.

## 8. BUDGET

- **DIY (Do-It-Yourself) Website**

### **Initial Costs:**

Domain Name: Approximately R200 - R350 per year. This is the cost to register your unique web address (e.g., kgmint'l.org).

Website Builder Subscription: These platforms (like Wix, Squarespace, or specialized church builders like The Church Co.) offer all-in-one solutions. Plans typically range from R300 - R1,200 per month, but many offers discounted rates if you pay for the full year in advance. This cost usually includes hosting and a basic website template.

Premium Template/Plugins: If you want a more unique design or specific features, you may need to purchase a premium template (typically a one-time cost of R1,000 - R3,500) or paid plugins.

### **Ongoing Costs:**

Subscription Fees: The monthly or annual cost of the website builder platform.

Total Budget: R2,000 - R5,000, with ongoing monthly costs of R300 - R1,200.

### **BUDGET SUMMARY AND KEY CONSIDERATIONS:**

Budget tier	Initial Cost (Approx.)	Ongoing Cost (Approx.)	Best for
Basic DIY	R2,000 – R5,000	R300 – R1,200/month	Small churches with limited budgets and a tech-savvy volunteer.
